Community

Come meet
some of East
Kingston's
most famous
workers!

Without their
help, our little
town wouldn't
be nearly as
great.

June 26***

***10am -
12pm***

***All
Together
Now***

Working Together

Amazing Animal Builders

Join us to learn about the river ecosystem as we investigate models of structures made by some of nature's very best architects and engineers! From mammals to birds - participants will get to examine and hypothesize about these builders, think about how they work together, and explore models of the incredible structures they create.

A museum educator will lead children in a hands-on, exciting, informative presentation - with a focus on the food web, river ecosystem, and the way animals fit into their niche within it. Children will explore four activity stations and guess which animal or type of animal built the model structure. At the end, our educator will reveal the answers, and share some fun facts about each builder. Children will also learn about how people work with wildlife to create a better ecosystem- by building!

REGISTRATION REQUIRED

***Best for ages
5-10***

***Friday,
June 30***

11am

MR. AARON

Let's get "All Together Now" and join Mr. Aaron for some seriously fun music and dancing.

Known all over New England and YouTube for his upbeat music and mult-instrumentalism, Mr. Aaron will have the crowd dancing and singing along--kids and grownups alike! You'll hear different musical instruments, like the guitar, saxophone, and cajon.

Get a head start and listen to the music at www.mraaronmusic.com, or search for Mr. Aaron on YouTube or your favorite streaming service.

**Best for ages
0-12**

**Thursday,
July 6**

10am

FriendShip Bracelets

Friendship bracelets bring good luck! Legend has it that if you make a wish while tying on a bracelet, it will come true once the bracelet falls off of its own accord.

With rope, beads, knots and more, we'll be learning all different ways to make friendship bracelets!

This program will feature different bracelets for different ages so all can participate.

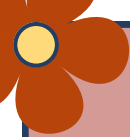

***Best for ages
5-15***

***Saturday,
July 8***

11am

Giant Crosswords

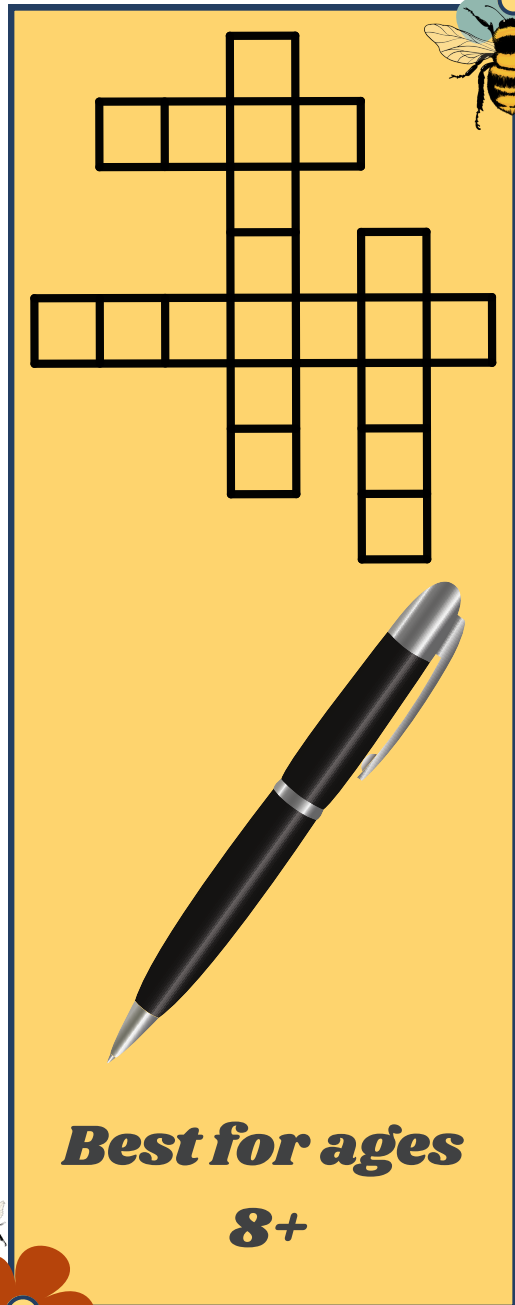

Decipher the clues to solve
East Kingston's largest
crossword puzzle!

A mix of scavenger hunt
and crossword puzzle,
participants will be given
riddles and clues and have
to work together to solve
the GIANT crossword.

Sign up Required

***Wednesday,
July 12***

***Best for ages
8+***

3pm

Meet the Bees

with the Pawtuckaway Beekeepers Association

Join us in welcoming the
Pawtuckaway Beekeepers
Association!

We'll learn all about honey bees,
their queen, and how they work
together to make their hive
bigger and better every day.

We'll meet some honey bees
(safely, of course), taste some
honey, and learn how to make
our environment better for all
bees!

***Thursday,
July 20***

10am

Flower Power

Flowers and plants help the earth (and us!) breathe better.

This DIY Program will have you painting your very own flower pots in any style you like.

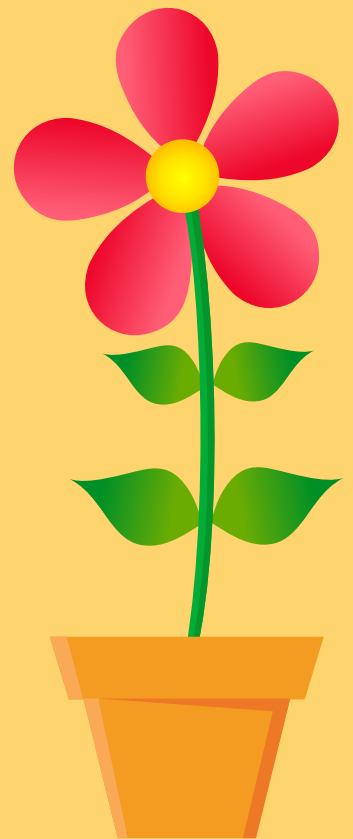

After your pot is dry, we'll plant beautiful flowers inside your pot for you to take home and grow strong.

Materials provided and space is limited. Registration is **REQUIRED**

**“The Earth
laughs in
flowers.”**

**— Ralph Waldo
Emerson.**

***Thursday,
July 27***

1pm

Rocky Shores

University of New Hampshire

Spanning the area between the low and high tide lines, the intertidal zone of the rocky shore of the New England seacoast is an ecological treasure trove of organisms whose survival is challenged by a variety of extreme conditions including crashing waves, hours of exposure to air, temperature and salinity fluctuations, and predation from both land and sea. Yet even in these conditions there is a rich variety of marine organisms that have adapted well to this ecosystem.

Who is wild and crazy enough to live on the Rocky Shore? How do these creatures survive and live along New Hampshire's rocky shore?

Join us as we explore our rocky shores! We'll be visited by the UNH SeaTrek Program.

University of New Hampshire

***Wednesday,
August 2***

The UNH Marine Docent Program is a volunteer-based effort that presents educational programs that provide a link between the University's research community and the public. Docents teach marine science to students in schools and camps, adults in community groups and organizations, and at public events in a variety of settings.

10am

Tricklin' Falls

Family Night

A favorite each year, join us at Tricklin' Falls in East Kingston for family night! You'll be able to explore the camp, rock climb, swim, explore the archery range and do the ropes course.

There's even a playground!

**140
Haverhill
Road,
E. Kingston,
NH**

***Thursday,
August 3***

***6:30-
8pm***

Recycled Robots

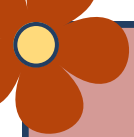

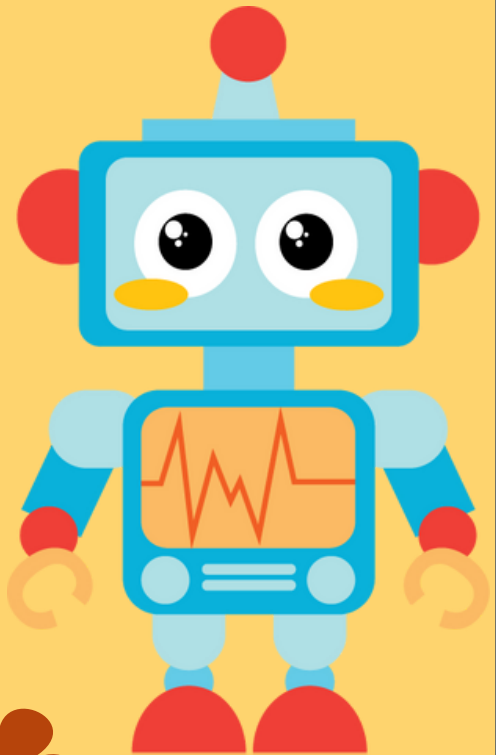

Mix and match
recycled materials and
make your new best
friend!

Using recycled
materials, and a lot of
innovation, we'll be
attempting to build our
very own robots.

***Saturday,
August 5***

11am

For all ages

EKPL Field Day

There's nothing better
than a good, old-
fashioned Field Day!

Celebrate the end of
Summer Reading with us
out on the lawn with lots
of field day games, raffle
prizes, loads of snacks,
fun music and so much
more!

***Summer
Reading
certificates
and final
prizes will be
distributed
at this event.***

For all ages.

***Saturday,
August 12***

11am
